Education

Guru Gobind Singh Indraprastha University, BCA

Aug 2022 – June 2025

- CGPA: 8.4/10

SKILLS SUMMARY

Languages: Python, JavaScript, SQL, Dart, HTML, CSS

Frameworks/Libraries: React, Redux, Express.js, FastAPI, Flutter, Bootstrap, React Testing Library (RTL), DotNet

Databases: MySQL, PostgreSQL, Oracle, Firebase Firestore

Tools: Git, GitHub, Power BI, Jupyter Notebook, Google Colab, VS Code

Platforms and Technologies: ReactJS, Redux, Express.js, REST APIs, GraphQL, API Integrations, Firebase, Docker, Git, CI/CD, FlutterFlow, Responsive Web Design

Work Experience

AI Automation Developer, Steel Authority of India LTD , Delhi, India

July 2024 – Aug 2024

- Developed AI-powered automation solutions and responsive web applications using HTML, CSS, JavaScript, and backend database integration.
- Increased operational efficiency by approximately **60–80%** through workflow automation, minimizing human intervention and reducing processing time.

Software Developer | AI & Product Engineering, Omnistarr, MA, USA

June 2025 - Present

- Developed and maintained an AI-driven healthcare ecosystem comprising interconnected applications, including patient, caregiver, and administrative platforms, by building backend services, API integrations, and automation workflows that streamlined operations for patients, nurses, caregivers, and administrators.
- Designed and implemented backend workflows involving API integrations, speech-to-text processing, structured data extraction, and automated document generation, reducing manual effort by **85–90%** while significantly improving operational efficiency and documentation accuracy.
- Helped build and optimize interconnected application modules while contributing to UI/UX development, enhancing screen responsiveness, usability, and overall application performance across the platform.
- Performed feature validation, regression testing, bug tracking, and cross-platform testing to ensure application stability, production readiness, and smooth deployment cycles.

PROJECTS

Enterprise AI Assistant

github

- Built a multimodal AI assistant integrating LLM APIs, speech-to-text processing, conversational memory, and image analysis using Python, REST APIs, and real-time response pipelines.

Parking Spot Detector

2024

- Developed a computer vision system using OpenCV to identify available parking spaces from real-time images.

Movie recommendation system

2024

- A personalized movie recommender using machine learning algorithms.

RAG-based Knowledge Assistant

2025

- Built a Retrieval-Augmented Generation chatbot using vector embeddings and LLMs to provide context-aware responses.

CERTIFICATES

Intro to Claude AI, Scrimba, Coursera

June 2026

Generative AI by HCL and Intel, IIT Delhi

March 2025
