SUMMARY

Software Developer with 1+ years of experience building full-stack web and mobile applications using React, Node.js/Express, PostgreSQL, and Firebase. Skilled in Python, cloud function pipelines for data driven apps.

EDUCATION

Manipal Institute of Technology, MCA Aug 2026 – Present
Guru Gobind Singh Indraprastha University, BCA Aug 2022 – June 2025
• CGPA: 8.4/10

SKILLS SUMMARY

Languages: Python, JavaScript, SQL, Dart, HTML, CSS
Frameworks/Libraries: React, Redux, Express.js, FastAPI, Flutter, Bootstrap, React Testing Library (RTL), DotNet
Databases: MySQL, PostgreSQL, Oracle, Firebase Firestore
Tools: Git, GitHub, Power BI, Jupyter Notebook, Google Colab, VS Code, AI-assisted Development (Cursor, Claude)
Platforms and Technologies: ReactJS, Redux, Express.js, REST APIs, GraphQL, API Integrations, Firebase, Docker, Git, CI/CD, FlutterFlow, Responsive Web Design

WORK EXPERIENCE

Software Developer, AI & Product Engineering, Omnistarr, MA, USA June 2025 - Present
• Developed nurse-facing and admin-facing features across an integrated ecosystem of apps using Flutter/Dart, including deep-linked document review flows, PDF viewing (Syncfusion), and digital signature capture with Firebase Storage/Firestore integration, improving workflow completion speed for nurses and administrators
• Built a Firebase Cloud Function pipeline querying 25+ PostgreSQL tables to generate a unified data model, mapped to 50+ AcroForm PDF document types, and integrated with Flutter UI and Firestore for persistent, refresh-safe document generation, reducing manual form-filling effort by 85–90%.
• Helped build and optimize interconnected application modules while contributing to UI/UX development, enhancing screen responsiveness, usability, and overall application performance across the platform.
• Diagnosed and resolved critical production bugs across intake, enrollment, and document workflows, including data mapping mismatches, Screen navigation logic errors, and Flutter build failures from dependency/toolchain upgrades, ensuring stable releases across app ecosystem.

AI Automation Developer, Steel Authority of India LTD , Delhi, India July 2024 – Aug 2024
• Developed AI-powered automation solutions and responsive web applications using HTML, CSS, JavaScript, and backend database integration.
• Increased operational efficiency by approximately **60–80%** through workflow automation, minimizing human intervention and reducing processing time.

PROJECTS

Enterprise AI Assistant github
• Built a multimodal AI assistant integrating LLM APIs, speech-to-text processing, conversational memory, and image analysis using Python, REST APIs, and real-time response pipelines.

Parking Spot Detector 2024
• Developed a computer vision system using OpenCV to identify available parking spaces from real-time images.

Movie recommendation system 2024
• A personalized movie recommender using machine learning algorithms.

RAG-based Knowledge Assistant 2025
• Built a Retrieval-Augmented Generation (RAG) assistant using **Hugging Face Transformers**, vector embeddings, and LLMs to provide context-aware responses by retrieving relevant knowledge from custom datasets.

CERTIFICATES

Intro to Claude AI, Coursera June 2026
Generative AI by HCL and Intel, IIT Delhi March 2025
