## Education

Guru Gobind Singh Indraprastha University, BCA Aug 2022 – June 2025  
• CGPA: 8.4/10

## SKILLS SUMMARY

**Languages:** HTML, CSS, JavaScript, Python, Dart, SQL

**Frameworks/Libraries:** React, Flutter, Pandas, NumPy, Scikit-Learn, Matplotlib, Bootstrap, DotNet

**Databases:** MySQL, PostgreSQL, Oracle, Firebase Firestore

**Tools:** Git, GitHub, Power BI, Jupyter Notebook, Google Colab, VS Code

**Platforms and Technologies:** GraphQL, REST APIs, Firebase, FlutterFlow, Android Studio, Xcode

## Work Experience

**Web Developer**, Steel Authority of India LTD , Delhi, India July 2024 – Aug 2024  
• Collaborated with the IT department to develop a fully functional webpage, which was successfully published and deployed.  
• Gained hands-on experience in managing and optimizing the company's backend database, ensuring seamless data handling and integration.

**Software Developer**, Omnistarr, MA, USA June 2025 - Present  
• Contributed to the development of a healthcare technology ecosystem comprising **Vezma.AI**, an **Intelligent Caregiver application**, and an **Admin Portal**, enabling seamless collaboration between healthcare providers, patients, and administrators.  
• Developed and integrated features involving AI-powered audio processing, speech-to-text transcription, intelligent data extraction, and automated medical documentation generation to streamline clinical workflows and reporting.  
• Built and enhanced interconnected modules that synchronize patient, caregiver, and administrative data, providing centralized visibility and improving operational efficiency across the platform.  
• Performed feature validation, regression testing, and cross-platform testing across Vezma.AI, Intelligent Caregiver, and Admin Portal applications to ensure stability and production readiness.

## PROJECTS

**AI Assistant with Visual Intelligence** github  
• Built a Gemini-powered multimodal AI assistant supporting image analysis, text generation, and conversational interactions using Python and REST APIs.

**Parking Spot Detector** 2024  
• Developed a computer vision system using OpenCV to identify available parking spaces from real-time images.

**Movie recommendation system** 2024  
• A personalized movie recommender using machine learning algorithms.

**Q and A Chat bot using RAG** 2025  
• Built a Retrieval-Augmented Generation chatbot using vector embeddings and LLMs to provide context-aware responses.

## CERTIFICATES

**Generative AI by HCL and Intel**, IIT Delhi March 2025  
**Programming with Python**, Coursea June 2025
